MOTTO

"For me, it's not speed
at which I do something, but perfection.
When I do something, I want to do it perfectly.
When I do something perfectly,
then I inevitably do it very quickly too"

Walter Röhrl

PHILOSOPHY

The products and solutions from **Visomax Coating GmbH** are designed for people who value **individuality, simplicity** and **efficiency**, and who appreciate **quality** every day.

What we do is difficult to sum up in one single word. 'Innovation' falls too short, and striving for perfection would be setting the bar too high. But one thing is clear for us: **we make no compromises**. For us, the **perfect finish** is more than just a result – it is a **matter to our heart**.

We see ourselves as **a partner for individual process solutions**. Together with our customers, we analyse challenges, develop **tailor-made approaches** and integrate these reliably into existing workflows. For us, the focus is not on the product itself, but on the end result: a **compelling, functional outcome.**

Our team works with **passion**, **commitment** and a **willingness** to think **outside the box**. We contribute ideas, challenge the status quo and continuously refine our products and processes. Always with the aim of adapting them even better to our customers' requirements.

We believe that true quality does not come from complexity, but from **clear**, **well-thought-out** and **functional solutions**. That is why we act **pragmatically**, **precisely** and **reliably**.

Our aim is to create solutions worldwide that are **simple**, **safe**, **fast** and **stable**, and that deliver lasting results. Because for us, the **perfect finish** is not just a goal, but a **mindset**.

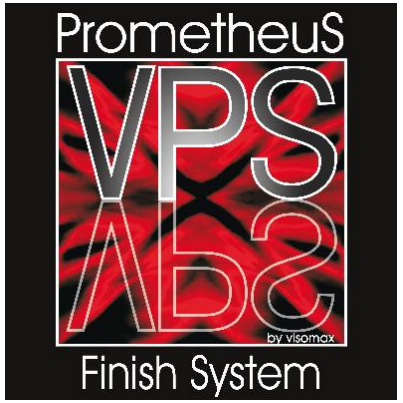
FACTS

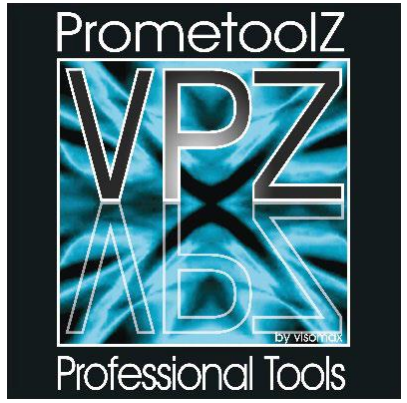
Drawing on our extensive range of components and the machines designed to work with them, we offer our customers the right solution from a single source. Simple, reliable and efficient.

Our internal quality and process procedures are managed in-house in accordance with
Quality Management DIN ISO 9001:2015 &
Environmental Management DIN ISO 14001:2015
and are regularly certified.

- Established in 2003
- Over 40 employees
- Over 1,500 customers from over 30 countries
- Supplying over 40 automotive plants worldwide
- Distribution partners in
  the USA, China, France, the UK, Poland, Mexico, Canada, Australia, Switzerland, the Netherlands and South Africa.

BRANDS





Visomax AbraxX

Professional abrasives

Visomax ClearE

Professional cleaning, care & SMART repair

Visomax PrometheuS

Professional polishing processes

Visomax Prometoolz

Machine brands for professional use

AbraxX ABRASIVES

Our VAX products are suitable for all professional applications where performance, cleanliness, speed and cost-effectiveness play a key role. Our range includes film abrasives, paper-backed abrasives, foam-backed products and foam-embedded abrasives (sanding pads). The design and properties of our products are tailored to the specific application. Depending on the product, they are available with adhesive or hook-and-loop fastening in various types, sizes and shapes.

Areas of application:

- Automotive industry
- Supply industry (TIER1 e.g. plastic components)
- Shipbuilding
- Furniture industry & joinery
- Instrument making

ClearE CLEAN + REPAIR

Our VCE products are suitable for all professional applications where performance, cleanliness, speed and cost-effectiveness play a key role. The correct use of our professional leather and textile repair system is taught, amongst other things, through intensive training at our premises.

Areas of application:

- Repair of leather interiors
- Textile interiors
- Painting of leather surfaces
- Customisation of leather surfaces
- General vehicle care and cleaning

PrometheuS FINISH SYSTEM

Our VPS products are suitable for all professional polishing applications where efficiency, cleanliness, speed and cost-effectiveness play a key role. Our range includes sponges, polishes and microfibre cloths – everything you need to develop the perfect process for your requirements.

Areas of application:

- Automotive industry
- Supply industry (e.g. plastic components)
- Shipbuilding
- Furniture industry & joinery
- Instrument making

PrometoolZ PROFESSIONAL TOOLS

Our VPZ products are designed for professional use, where efficiency, cleanliness, speed and cost-effectiveness play a key role. To implement professional machining concepts, you need components that are perfectly coordinated. The technical specifications of our machine series meet the industrial standards required in terms of vibration levels, air and energy consumption, whilst operating almost silently in some cases.

To ensure greater efficiency, we plan, design and manufacture components such as polishing time controls, lighting systems and switchgear in-house. We thus offer the highest levels of quality, precision and flexibility. Our range of services also includes worldwide project support, installation and commissioning of all systems.

Areas of application:

- Automotive industry
- Supplier industry (TIER1 e.g. plastic components)
- Shipbuilding
- Furniture industry and joinery
- Instrument making

EXAMPLES OF USE

PrometoolZ ROBOT TOOLS

To make the finishing process more efficient as batch sizes and quantities increase, we offer solutions for the automated polishing of surfaces. Using provided CAD data, the possibilities and variants of the automated polishing process can be virtually simulated in advance.

Depending on the geometry and surface condition, the component is then processed over its entire surface by the robot, or imperfections are detected by a camera system and polished selectively. To ensure the stability of the process, our Visobot units are equipped with an integrated pad washer and a pad changer.

We offer everything from a single source and provide support with process development and the selection of grinding and polishing media, accompanying our customers right through to the finished, compact robotic system, including its commissioning.

SERVICES AT A GLANCE

- Tailored, comprehensive solutions from a single source
- Regular and personal contact with our application engineers
- Fast and efficient problem-solving
- ISO-certified quality management in accordance with DIN ISO 9001:2015
- ISO-certified environmental management in accordance with DIN ISO 14001:2015
- Distribution partners in
  the USA, China, France, the UK, Poland, Mexico, Canada, Australia, Switzerland, the Netherlands and South Africa.
