AbraxX

Abrasives

Visomax AbraxX - die brand for professional sanding

Since 2003, we have been developing innovative solutions for the professional treatment of painted surfaces in close collaboration with leading premium car manufacturers. The AbraxX product range stands for the highest levels of efficiency, quality and cost-effectiveness in paint preparation and the finishing process.

The AbraxX VAX catalog provides a comprehensive overview of our range of abrasives for professional applications - available in various designs, sizes and shapes.

Includes:

- Film-backed abrasives
- Paper-backed abrasives
- Foam-laminated products
- Foam-embedded abrasives (sanding pads)

The VAX series is already in use in the following sectors:

- Automotive industry
- Supplier industry (e.g. plastic components)
- Shipbuilding
- Furniture industry and joinery
- Instrument manufacturing
- Manufacture of high-gloss interiors for yachts and aircraft
- Aircraft manufacturing

PrometheuS

Finish System

Visomax PrometheuS - the brand for professional polishing

Since 2003, we have been developing innovative products for leading premium car manufacturers for the professional finishing of painted surfaces. Our expertise stands for the highest quality, efficient processes and perfect results whilst ensuring the economical use of materials.

The PrometheuS product range combines perfectly matched polishes and polishing pads for professional paint finishing – precise, efficient and cost-effective.

The VPS series is already in use in the following sectors:

- Automotive industry
- Supplier industry (e.g. plastic components)
- Shipbuilding
- Furniture industry and joinery
- Instrument manufacturing
- Manufacture of high-gloss interiors for yachts and aircraft
- Aircraft manufacturing

More sustainable packaging – trusted quality

Our products are being repackaged in a new, more sustainable format: instead of plastic canisters, we are now supplying them in handy product bags (polybags). Naturally, the product quality, composition, item numbers, application and Power remain unchanged.

The new polybags use significantly less plastic, reduce transport emissions and packaging waste, and can be emptied almost completely. At the same time, they allow for clean, easy refilling and make handling easier in day-to-day work.

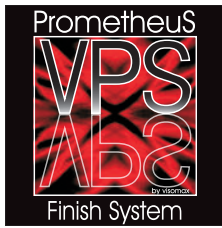

With this change in packaging, we are working together to contribute to greater sustainability – without compromising on quality or Power. Please do not hesitate to contact us if you have any questions.

VISOMAX CUSTOMIZED PROJECTS

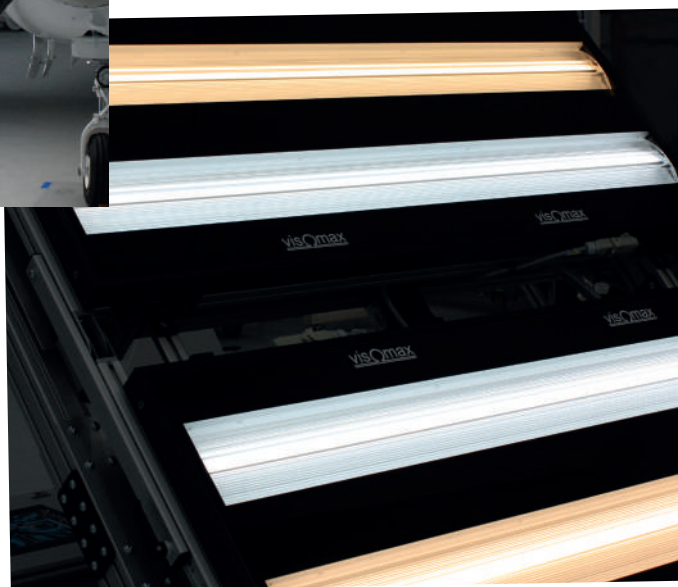

Custom-built solutions for the manufacturing and industrial sectors

One of our strengths is the customised manufacture of all types of lighting systems. These include, amongst other things, light tunnels, fully equipped workstations, as well as bespoke workbenches and light walls.

Visomax workbenches are, in almost all cases, bespoke designs, developed in accordance with the customer's specifications or tailored to the component to be inspected and machined.

In doing so, we always take the ergonomics of the workstation into account and integrate the necessary tools and consumables into the workbench in a practical manner. Thanks to our many years of experience in this sector, we are on hand as a professional partner throughout the entire project.

Get personalised advice now on a product tailored to your needs.

Inspection & Lighting Systems | Mobile Light Walls | Light Wall 45° ECO | LED

Article No.	Description	Unit
PZ-MLW-45-LED-ECO	Mobile Light Wall 45° LED - ECO	1 Pcs.

Product description

The precise illumination of painted surfaces makes imperfections and paint faults immediately visible through the reflected light – particularly on high-gloss surfaces. High-quality LED lights in a robust aluminium housing offer maximum flexibility for professional use. The ECO version is the ideal solution for everyday workshop use.

Technical Data

Length [mm]	850
Depth/Width [mm]	800
Height [mm]	2250
Height [folded in mm]	1830
Weight [kg]	68
Roles [Standard]	2
Roles [braked]	2
Power connection [V AC/Hz]	230 /50
Dimmable	yes
Power [W]	153

Color rendering index	> 80
Light sources bottom	4 LED modules
Light sources top	4 LED modules

Inspection & Lighting Systems | Mobile Light Walls | Light Wall 45° OEM | LED

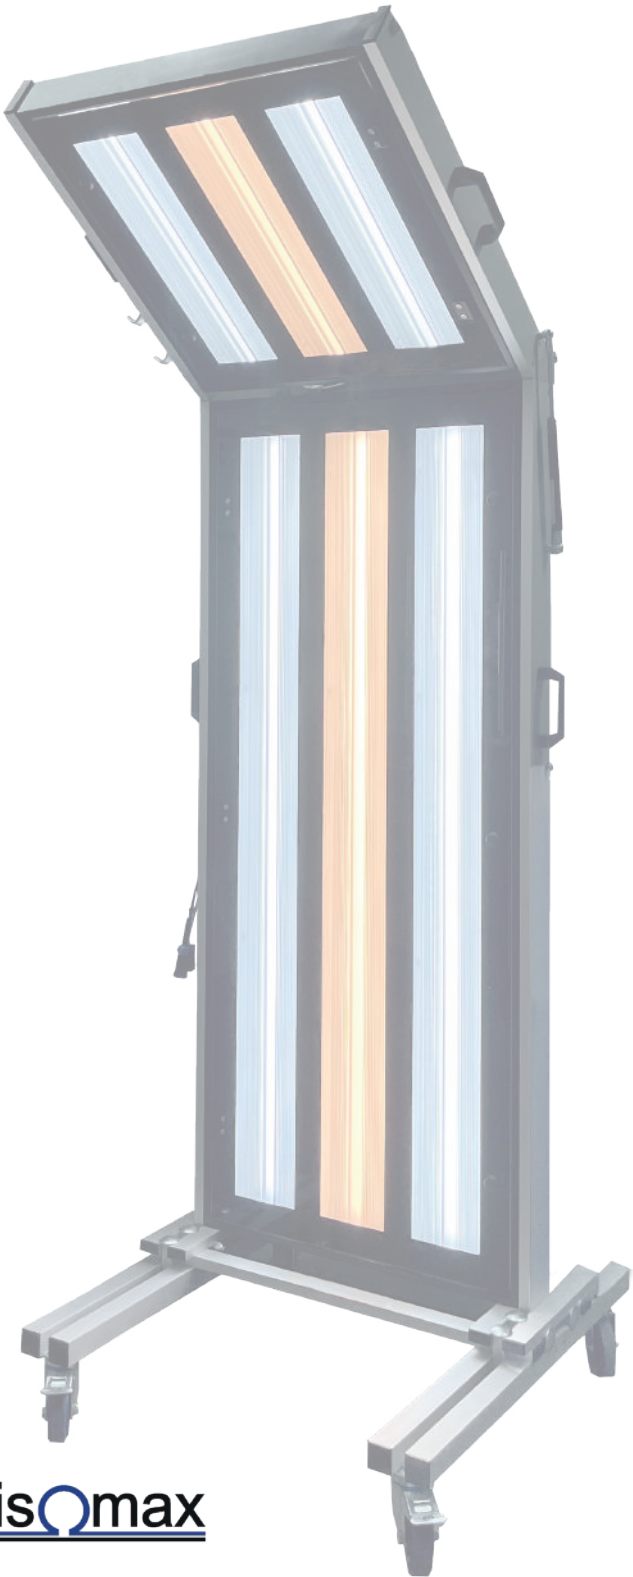

Article No.	Description	Unit
PZ-MLW-45-LED-OEM	Mobile Light Wall 45° LED - OEM	1 Pcs.

Product description

The OEM surface inspection light ensures precise and consistent lighting conditions and enables the reliable detection of paint defects and surface irregularities. Designed to meet the highest quality standards, it is the ideal solution for industrial use and professional surface inspection.

Technical Data

Length [mm]	850
Depth/Width [mm]	800
Height [mm]	2250
Height [folded in mm]	1830
Weight [kg]	71,4

Light sources bottom	3 LED modules
Light sources top	3 LED modules

Inspection & Lighting Systems | Mobile Light Walls | Light Wall 45° MIX | LED

Article No.	Description	Unit
PZ-MLW-45-LED-MIX	Mobile Light Wall 45° LED - OKL/HL	1 Pcs.

Product description:

The MIX version combines the advantages of a surface inspection light with precise hologram spotlights, offering the perfect combination for reliable fault detection. Surface irregularities, paint defects and holograms become quickly visible, and surface quality is improved in the long term. Ideal for professional use in paint inspection.

Technical Data

Length [mm]	850
Depth/Width [mm]	900
Height [mm]	2250

PrometoolZ - Professional Tools Inspection and Lighting Systems

Article No.	Description	Unit
PZ-FS-LED-ECO	Finish-Station LED - ECO	1 Pcs.

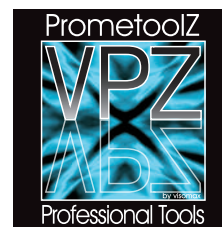

Product description Light Wall ECO 45° LED with built-in tool cabinet

Advantages of the LED Finish Station:

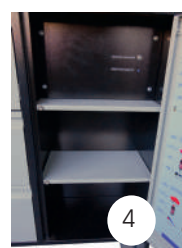

- Professional illumination of painted surfaces
- Improved surface quality
- Reduction in customer complaints
- Reduction in the rate of rework
- Resource-efficient consumption of materials and energy
- Individually adjustable lighting scenarios for working on different surfaces
- Improved health and safety through fewer trip hazards
- Centralised power supply for all tools
- Tidiness and cleanliness in the workplace

PrometoolZ - Professional Tools Inspection and Lighting Systems

- 1 Tool supports incl. Socket
Tool supports for Electric tool (Socket 230 V)
- 2 Cable reel
for 10 Meter Connection cable
- 3 Coiled cable 6 m
Safe and accident-free working with a high degree of flexibility
(no tangled cables)
- 4 Storage space
Sufficient storage space for consumables and tools
- 5 Security
Finish Tools separat secured
- 6 Bottle Fix
Store up to 6 bottles safely
- 7 Tool supports
Tool supports for Finish Tools

Technical Data

Width [mm]	970
Depth [mm]	800
Height [mm]	2260

Visomax Li-Ion Battery 12 V, 6,0 Ah (Art. No.: PZ01001383)
Visomax Charger for 12 V Batterys (Art. No.: PZ01001384)
Backup-Pad Ø73 mm (2,87"), 5/16" Thread (Art. No.: PZ073-560-22-4)

Technical Data

Length [mm]	210
Width [mm]	75
Height [mm]	135
Weight [kg]	690
Angle	90°
Offset [mm]	0
Power unit	continuously adjustable
Rotational speed [U/min]	1000-2500
Temperature [°C]	-5 bis +40
Max. humidity	80%
Sound pressure level [dB(A)]	60,5
LpA Uncertainty	3
Vibration emission level aH	1,07 m/s ²
Uncertainty K	1,5 m/s ²

Technical Details

Battery type	Lithium-Ion (Li-Ion)
Voltage [V/DC]	12
Capacity [Ah/Wh]	6 / 72
Weight [g]	380

Technical Details

Input Voltage [V AC]	100 - 240
Frequency [Hz]	50 / 60
Charging time [min]	90
Charging temperature [°C]	-20 bis +30
Weight [g]	330
Protection rating	II

Industrial vacuum cleaners | Staubschutzklasse M

Article No.	Description	Unit
PZ-VC-WDFC-35M	Industrial vacuum cleaners for electric machines, wet/dry, with vibration function, 35 litres, dust class M	1 pcs..
Contents:	Connection sleeve for power tools Automatic on/off switch for power tools Anti-static system Eco-filter system Flat-pleated filter, paper Protection class I Stop swivel castor	
Product description:	Compact, high-suction, single-motor industrial wet/dry vacuum cleaner with filter cleaning. Fitted with infinitely variable speed control and a socket with an automatic on/off function for controlling the vacuum cleaner when a power tool is connected. The vacuum cleaner complies with all European standards and is therefore suitable and approved for vacuuming dust classified as hazardous to health (dust class M). It meets the requirements of BGI 739 – Wood Dust: Occupational Safety and Health during Collection, Extraction and Storage. (BGI 739 is valid only in Germany) This compact, powerful and robust wet/dry vacuum cleaner is equipped with a highly efficient, fully automatic filter cleaning system, which enables large quantities of fine dust to be collected without interrupting work, whilst maintaining a consistently high suction power. Thanks to the anti-static system, the unit is earthed throughout, right down to the suction hose connector, including electrically conductive accessories to reduce electrostatic build-up when handling dry dust. Power tools can be connected to the built-in socket with a standby function. It comes as standard with infinitely variable speed control and an integrated accessory holder on the unit for safe and easy transport. The unit is also ideally suited for vacuuming up liquids.

VisCoat

coatings + paints

Visomax VisCoat – the brand for professional paint finishing accessories

Our company possesses unique expertise and a comprehensive range of products for the treatment of painted surfaces. Through close collaboration with leading premium car manufacturers since 2003, we are constantly refining our products and concepts.

The VisCoat product range has been specially developed for professional use and stands for efficiency, cleanliness, speed and cost-effectiveness – with components that are perfectly coordinated with one another.

The WC series is already in use in the following sectors:

- Automotive industry
- Supplier industry (e.g. plastic components)
- Shipbuilding
- Furniture industry and joinery
- Instrument manufacturing
- Manufacture of high-gloss interiors for yachts and aircraft
- Aircraft manufacturing

Kits & Accessories

Visomax Kits & Accessories

Our company boasts a world-class range of experience, expertise and products for processing in the field of painted surfaces.

The intensive, global collaboration we have maintained with leading premium car manufacturers since 2003 provides a vital foundation for us and our customers in the further development of our products and concepts.

The customer and project requirements placed on our company consistently centre on optimising process times and achieving perfect results on high-gloss painted surfaces, whilst ensuring extremely efficient and resource-conserving material consumption.

In order to carry out professional polishing processes, coordinated components are required; these are perfectly complemented by our range of accessories.

Our exclusive case sets and kits have been put together for you in accordance with our high industry standards.

Get in touch with us for the perfect finish.

Terms and Conditions of Delivery and Payment

Pricing

All prices published here are recommended retail prices in euros, excluding VAT. Due to rising raw material prices, we reserve the right to increase prices at short notice.

Payment

Unless otherwise agreed, invoices are payable within 30 days of the invoice date.

Please send orders in writing only to bestellung@visomax.de.

Terms and Conditions

§ 1 General Provisions

(1) The following terms and conditions form an integral part of the contract concluded with us.
(2) Our General Terms and Conditions of Sale, in their latest version, shall also apply to all subsequent transactions without the need for this to be expressly stated or agreed upon at the time of their conclusion. They shall apply only to businesses within the meaning of Section 310(1) of the German Civil Code (BGB).
(3) Our General Terms and Conditions of Sale apply exclusively. We hereby reject any counter-confirmations, counter-offers or other references by the customer to their own terms and conditions. Any deviating terms and conditions of the customer shall only apply if we have confirmed them in writing.
(4) The customer may only assign claims arising from legal transactions concluded with us with our express consent.

§ 2 Offers; Orders

(1) Our offers are always subject to change – in particular with regard to quantity, price and delivery time.
(2) We supply goods that have been electrically tested (unless otherwise agreed). Measurements that can only be carried out at the customer's premises must be carried out by the customer (loop impedance, etc.)
(3) The products are designed in accordance with German standards. Country-specific or customer-specific modifications must be specified at the time of ordering (cross-sections, conductor colours, connector type, etc.)
(4) Source codes (robot/PLC/PC/etc.) are never included in the scope of delivery, even if this is required by the customer's terms and conditions of purchase.
(5) Orders placed by the customer are only deemed to have been accepted once we have confirmed them in writing. If we do not specifically confirm a contract concluded verbally or by telephone in writing, the invoice issued by us shall serve as confirmation.
(6) We reserve ownership rights and copyright in illustrations, drawings, calculations and other documents. This applies in particular to written documents designated as 'confidential'. The customer must obtain our express written consent before disclosing them to third parties.

§ 3 Prices, Weights

(1) Our prices are exclusive of value added tax applicable at the time of delivery and are quoted – unless otherwise stated in the order confirmation – 'ex works'.
(2) If, between the conclusion of the contract and delivery, additional or increased charges – in particular customs duties, levies or currency adjustments – arise, we shall be entitled to increase the agreed purchase price accordingly. The same applies to inspection fees.
(3) The weight recorded at the time of loading shall be decisive for our calculation of the purchase price. Normal weight loss during transport shall be borne solely by the customer. Unless otherwise agreed, transport packaging is included in the price.
(4) The deduction of a cash discount requires a separate written agreement.
(5) Unless otherwise stated in the order confirmation, the purchase price is payable net (without deduction) within 30 days of the invoice date.

§ 4 Delivery; Delivery Time, Limitation of Liability in the Event of Delayed Delivery

(1) The delivery period specified by us shall commence only once all technical issues have been clarified.
(2) Compliance with our delivery obligation is further subject to the timely and proper fulfilment of the customer's obligations. We reserve the right to raise the defence of non-performance of the contract.
(3) The goods are always transported uninsured and, in all cases, at the customer's risk. This also applies to carriage paid deliveries and irrespective of the means of transport used. Transport insurance shall only be taken out at the customer's express request.
Any costs arising therefrom shall be borne solely by the customer.
(4) In the absence of any written agreement to the contrary, the choice of place of

dispatch, route and means of transport shall be made by us at our discretion, without assuming any liability for the cheapest and fastest transport.

(5) If the customer provides the means of transport, they shall be responsible for ensuring it is made available on time. We must be notified of any delays in good time. Any costs arising therefrom shall be borne by the customer.

(6) We are entitled to make reasonable partial deliveries.

(7) Our obligation to deliver is always subject to timely and proper supply from our own suppliers.

(8) Stated delivery and unloading times are always non-binding, unless expressly agreed otherwise in writing.

(9) Delivery delays due to force majeure or unforeseen events for which we are not responsible, such as operational disruptions, strikes, lockouts, official orders, the subsequent loss of export or import opportunities, as well as our reservation regarding our own supply in accordance with paragraph (7) above, shall release us from the obligation to adhere to any agreed delivery or unloading times for the duration and to the extent of their effects. They shall also entitle us to withdraw from the contract, without the customer being entitled to compensation or any other claims as a result.

(10) If an agreed delivery or unloading time is exceeded without there being any obstacle to delivery as referred to in paragraph (9) above, the customer must grant us, in writing, a reasonable grace period of at least two weeks. If we fail to meet this grace period through our own fault, the customer shall be entitled to withdraw from the contract, but not to claim damages for non-performance or delay, unless we are found to have acted with intent or gross negligence. Provided that the delay in delivery is not due to an intentional breach of contract for which we are responsible, our liability for damages shall be limited to the foreseeable loss typically arising from such a breach.

(11) Where the delay in delivery is due to an intentional or grossly negligent breach of contract for which we are responsible, we shall be liable in accordance with the statutory provisions. However, where the delay in delivery is not due to an intentional breach of contract for which we are responsible, our liability for damages shall be limited to the foreseeable damage that typically occurs.

(12) Furthermore, our liability for damages in the event of a delay in delivery is limited to 3 per cent of the value of the delivery for each full week of delay, but shall not exceed a total of 15 per cent of the value of the delivery.

§ 5 Default of Acceptance; Transfer of Risk

(1) If the customer is in default of acceptance or culpably breaches any other obligations to cooperate which result in a delay in delivery, we shall be entitled to claim compensation for the loss incurred by us in this respect, including any additional expenses. We reserve the right to make further claims.

(2) Unless otherwise specified in the contract, delivery is agreed to be 'ex works'. If the customer is in default of acceptance, the risk of accidental loss or accidental deterioration of the goods shall pass to the customer at the time at which the customer falls into default of acceptance or payment.

§ 6 Obligation to Inspect and Raise Objections

(1) The customer is obliged, upon delivery of the goods to the agreed destination or, in the event of collection by the customer, upon taking possession of them, to immediately inspect them in respect of quantity, weight and packaging, and to note any objections in this regard on the delivery note or consignment note, and to carry out a quality control check, at least on a representative random basis, by opening the packaging (cartons, sacks, tins, film, etc.) to an appropriate extent and inspecting the goods themselves as regards their external condition.

(2) When giving notice of any defects, the customer must observe the following procedures and time limits:
a) The complaint must be made by the end of the working day following the delivery of the goods to the agreed destination or their acceptance. In the case of a complaint regarding a latent defect which, despite a proper initial inspection

in accordance with paragraph (1) above, initially remained undetected, a different time limit applies, whereby the complaint must be made by the end of the discovery, but no later than two weeks after delivery of the goods or their acceptance.

b) The complaint must be received by us in writing, by email or by fax, setting out the details, within the aforementioned time limits. A complaint made by telephone is not sufficient. Complaints made to commercial representatives, brokers or agents shall be disregarded.

c) The nature and extent of the alleged defect must be clearly stated in the complaint.

d) The customer is obliged to keep the goods subject to complaint available at the place of inspection for examination by us, our supplier or experts commissioned by us.

(3) Complaints regarding the quantity, weight and packaging of the goods are excluded if the note required under the preceding paragraph (1)(a) is missing. Furthermore, any complaint is excluded as soon as the customer has mixed, reused or resold the delivered goods, or has commenced their processing or treatment.

(4) Goods for which a complaint has not been made in due form and within the prescribed time limit shall be deemed to have been approved and accepted.

§ 7 Warranty; Limitation of Liability; Warranty Period

(1) In the event of defects that are reported in the correct form and within the prescribed time limit and are also objectively justified, the customer shall be entitled to demand subsequent performance in the form of rectification of the defect or delivery of a new, defect-free item.

(2) Should the customer request the rectification of the defect, we shall bear the costs necessary for this purpose, in particular transport, travel, labour and material costs, provided that these are not increased by the fact that the goods have been moved to a location other than the place of performance.

(3) Where the customer claims damages, we shall be liable in accordance with the statutory provisions, provided that the damage was caused intentionally by us or our vicarious agents. Where the damage was not caused intentionally by us or our vicarious agents, our liability shall be limited to the foreseeable damage that typically occurs.

(4) Insofar as the customer is entitled to compensation for damage in lieu of performance, our liability is limited to the foreseeable damage that typically occurs.

(5) Liability for culpable injury to life, limb or health remains unaffected; this also applies to mandatory liability under the Product Liability Act

(6) The limitation period for claims for defects is 12 months from the transfer of risk. The limitation period in the event of a supply recourse claim under Sections 478 and 479 of the German Civil Code (BGB) remains unaffected; it is five years, calculated from the delivery of the defective item.

§ 8 Payment

(1) Unless otherwise stated in the order confirmation, the purchase price is payable net (without deduction) within 30 days of the invoice date.

(2) We do not accept bills of exchange or cheques. Discount and bill of exchange charges shall be borne by the customer and are payable immediately.

(3) Should the customer fall into arrears, we shall be entitled to charge interest on arrears at a proven rate, but at least at a rate of 9 percentage points above the ECB base rate, without the need for a specific reminder.

(4) If the customer is no longer conducting business in the ordinary course, in particular if their assets are subject to attachment, or if they experience a suspension of payments or even cessation of payments, or if they apply for the opening of insolvency proceedings, we shall be entitled to declare all our claims arising from the business relationship immediately due and payable, even if we have accepted bills of exchange or cheques. The same shall apply if the customer defaults on payments to us or if other circumstances come to light which cast doubt on their creditworthiness. Furthermore, in such a case, we shall be entitled to demand advance payments or the provision of security, or to withdraw from the contract.

(5) The customer shall only be entitled to set-off, retention or reduction if the counter-claims asserted by them in this regard have been legally established or expressly recognised by us. Furthermore, they shall only be authorised to exercise a right of retention if their counter-claim is based on the same contractual relationship.

§ 9 Retention of Title

(1) The goods delivered by us shall remain our property until the customer has settled all claims arising from the business relationship – including balance claims arising from current accounts as well as from refinancing or reverse bills of exchange.

(2) The customer is entitled to sell the goods delivered by us in the ordinary course of business. The authorisation granted hereunder shall lapse, in particular, in the cases set out in § 8(4) above. Furthermore, we are entitled to revoke the customer's authority to sell by written notice if the customer defaults on the fulfilment of their obligations towards us – and in particular on their payments – or if other circumstances come to light which cast doubt on their creditworthiness.

(3) The restrictions set out in paragraph 2 above shall apply mutatis mutandis to the customer's right to process the goods delivered by us. Through such processing, the customer shall not acquire ownership of the items produced, whether in whole or in part; the processing shall be carried out free of charge exclusively on our behalf as the manufacturer within the meaning of Section 950 of the German Civil Code (BGB). Should our retention of title nevertheless lapse due to any circumstances, the Customer and we hereby agree that ownership of the goods shall pass to us upon processing, that we accept such transfer of ownership, and that the Customer shall remain the custodian of the goods free of charge.

(4) If our goods subject to retention of title are processed or inseparably mixed with goods still owned by a third party, we shall acquire co-ownership of the new items or the mixed stock. The extent of the co-ownership shall be determined by the ratio of the invoice value of the goods subject to retention of title supplied by us to the invoice value of the remaining goods.

(5) Goods in which we acquire ownership or co-ownership in accordance with paragraphs (3) and (4) above shall, in the same way as the goods delivered to us subject to retention of title in accordance with paragraph (1) above, be deemed to be goods subject to retention of title within the meaning of the following provisions.

(6) The customer hereby assigns to us all claims arising from the resale of the goods subject to retention of title. Claims arising from a resale also include the claim against the bank which, in connection with the resale, has opened or confirmed a letter of credit in favour of the customer (= reseller). We hereby accept this assignment. If the goods subject to retention of title are a processed product or a mixed stock, containing, in

addition to goods supplied by us, only those items which either belonged to the customer or were supplied to him by third parties solely under what is known as simple retention of title, the customer shall assign to us the entire claim arising from the resale of the goods.

In any other case, i.e. where there is a concurrence of prior assignments to us and other suppliers, we shall be entitled to a proportion of the proceeds of sale, namely in proportion to the invoice value of our goods compared with the invoice value of the other processed or mixed goods.

(7) Insofar as our claims are, in total, secured beyond doubt to more than 125 per cent by the assignments or retentions of title explained above, the surplus of outstanding amounts or goods subject to retention of title shall be released at the customer's request, at our discretion.

(8) The customer is authorised to resell the purchased goods in the ordinary course of business; however, the customer hereby assigns to us all claims amounting to the final invoice amount (including VAT) of our claims arising from such resale against their customers or third parties, irrespective of whether the goods have been resold without or after processing. The customer remains authorised to collect these claims even after the assignment. This authorisation to collect shall lapse if the customer is no longer conducting business in the ordinary course of business within the meaning of the provision in § 8(4). Furthermore, we may revoke the customer's authorisation to collect if he defaults on the fulfilment of his obligations towards us, in particular with regard to his payments, or if other circumstances come to light which cast doubt on his creditworthiness. If the authorisation to collect ceases to apply or is revoked by us, the customer shall, at our request, immediately inform us of the debtors of the assigned claims, provide us with the information and documents necessary for collection, and notify the debtor of the assignment.

(9) In the event of third parties making a claim to our goods subject to retention of title or to the outstanding debts assigned to us, the customer is obliged to draw attention to our ownership/our rights and to notify us without delay. The costs of any intervention shall be borne by the customer.

(10) In the event of conduct in breach of the contract, in particular default on payment, the customer is obliged, upon our first request, to surrender the goods subject to retention of title still in their possession and to assign to us any claims for surrender against third parties relating to the goods subject to retention of title. Our taking back or seizure of the goods subject to retention of title shall not constitute a withdrawal from the contract. Following the repossession of the goods, we are authorised to realise their value. The proceeds from such realisation shall be set off against the customer's liabilities, less reasonable costs of realisation.

(11) In the cases referred to in § 8(4), we may require the customer to disclose to us the claims arising from resale and assigned to us in accordance with § 9(6), together with the names of the debtors. We are then entitled, at our discretion, to disclose the assignment.

(12) The customer is obliged to treat the goods with due care and – until the purchase price has been paid in full – to insure them at their own expense against fire, water and theft at their replacement value. Where maintenance and inspection work is required, the customer must carry this out in good time at their own expense.

(13) In the event of attachment or other interventions by third parties, the customer must notify us immediately in writing so that we may bring an action in accordance with Section 771 of the German Code of Civil Procedure (ZPO). Insofar as the third party is unable to reimburse us for the judicial and extrajudicial costs of an action brought in accordance with Section 771 ZPO, the customer shall be liable for any loss incurred by us as a result.

(14) The customer shall also assign to us, by way of security for our claims against him, any claims arising against a third party as a result of the goods being incorporated into immovable property.

§ 10 Empty containers

The customer is obliged to return empty containers (Euro crates, pallets, Euro hooks, etc.) to us in the same type, quantity and value as those received for the purpose of delivery. If the customer is unable to return the returnable containers to us upon delivery of our goods, they must immediately settle the returnable containers account at their own expense (obligation to deliver). If the customer is in default with the return of the returnable containers, we may, after setting a reasonable grace period, refuse to accept the return and claim monetary compensation from the customer.

§ 11 Final Provisions

(1) The place of performance for the delivery of the goods is our registered office.

(2) The place of jurisdiction for all disputes arising from the contractual relationship shall be Würzburg, in our favour. However, we may also choose a different place of jurisdiction.

(3) The law of the Federal Republic of Germany shall apply. International sales law is excluded. This expressly applies also to the application of the United Nations Convention on Contracts for the International Sale of Goods (CISG).

(4) The invalidity of individual provisions of these General Terms and Conditions of Sale shall not affect the validity of the remaining provisions. Invalid provisions shall be deemed to be replaced by valid provisions that are suitable for realising the economic purpose of the invalid provision as far as possible.
